About Renuterra

About us , numbers , values ,
impact , quality.

01

About US:

At Renuterra, our passion for sustainability drives us to engineer a waste-free future. We believe in transforming waste into valuable resources, reducing environmental impact, and fostering a circular economy.

Our comprehensive waste management solutions are designed to meet the diverse needs of our clients, ensuring efficient, safe, and sustainable practices.

Renuterra in numbers:

Chose renuterra as their waste management service partner.

+1.1k Clients

PET – collect and recycle more than **490 Ton** of plastic (PET).

+490 Ton

More than **600 ton** of general waste diverted from the landfill.

+600 Ton

Collect and treat more than **6500 tons** of medical waste.

+6.5k Ton

Collect and treat more than **5000 Ton** of hazardous waste.

+5k Ton

Our impact and commitment

we are committed to sustainable waste management and reducing environmental impact. Currently, we collect and recycle over **1,500 tons** of recyclables annually, contributing significantly to resource conservation.

With our ongoing efforts and the support of our clients, we aim to exceed **7,000 tons** of recyclables by 2026, driving the UAE closer to a circular economy.

Values:

Responsibility

We are accountable for providing environmentally sound waste management solutions.

Efficiency

We are accountable for providing environmentally sound waste management solutions.

Nurturing

We foster sustainable practices to protect communities and the environment.

Unity

Collaboration and teamwork drive our success

Transparency

We maintain open communication with clients and stakeholders

Excellence

We are committed to delivering top-quality service in every aspect.

Respect

We value our employees, clients and the communities we serve.

Reliability

Clients trust us for consistent dependable solutions.

Adaptability

We embrace change and innovation to meet evolving challenges.

Quality Commitment

At Renuterra, quality is at the core of everything we do. We adhere to the highest international standards to ensure safety, operational excellence, and environmental responsibility.

Certificates

Renuterra is certified with **ISO 45001:2028** for Occupational Health and Safety, **ISO 9001:2025** for Quality Management Systems, and **ISO 14001:2015** for Environmental Management Systems.

These certifications reflect our unwavering commitment to:

- Maintaining a safe and healthy environment for our employees and partners.
- Delivering consistent, high-quality services to meet and exceed client expectations.
- Promoting sustainable practices and minimizing environmental impact in all aspects of our operations.

With these certifications and our dedication to continuous improvement, we remain a trusted partner in waste management solutions across the UAE.

Training & Development

At Renuterra, we prioritize the growth and development of our team, with a special focus on our frontline staff. We firmly believe that our frontline employees are the heart of our company and the face of our service to customers. Their excellence in executing their roles is vital to our success and to achieving the highest levels of customer satisfaction.

Through regular training programs, skill development workshops, and performance enhancement initiatives, we ensure that our team is equipped with the knowledge and tools needed to excel in their roles.

Our commitment to continuous improvement empowers our staff to represent Renuterra with professionalism, competence, and dedication, reflecting our values in every customer interaction

Services

what are our services , Our key services

What Are Our Services?

At Renuterra, we offer a comprehensive range of waste management solutions designed to meet the diverse needs of our clients.

Our commitment to sustainability and innovation drives us to provide services that not only manage waste efficiently but also contribute to a cleaner, greener future. Below, you'll find an overview of our key services, each tailored to address specific waste management challenges and promote environmental stewardship.

Recycling collection:

We collect various recyclable materials, including paper, cardboard, plastic, glass, and aluminium, ensuring these materials are kept out of landfills.

Our team meticulously sorts recyclables into different categories for efficient processing, maximizing their potential for reuse.

To meet your specific needs, the Renuterra team will advise and provide you with the right bins or cages based on your requirements, available space, and the volume of materials generated.

This customized approach ensures a seamless and effective recycling process tailored to your operations.

By diverting recyclable items from landfills, we help save space and minimize environmental impact, contributing to a cleaner, healthier planet. We champion sustainability by encouraging the reuse and recycling of materials, creating a continuous cycle that benefits both the environment and the economy.

Food Waste Collection:

Renuterra is committed to transforming thousands of tons of food waste into valuable energy through the development of anaerobic digestion technology.

This process not only reduces the volume of food waste ending up in landfills but also generates renewable biogas, which can be used to produce electricity and heat.

To ensure efficient food waste management, Renuterra provides specialized bins tailored for food waste collection.

Our fleet of dedicated trucks is specifically designed to collect and transport food waste, ensuring it is properly segregated and diverted from landfills.

Most importantly, we offer customized solutions to help you minimize food waste and optimize your waste management processes.

Simply reach out to our team, and we'll be happy to collaborate with you to develop a strategy that meets your unique requirements while reducing your carbon footprint.

Door-to-Door Waste Collection:

Our door-to-door waste collection system is designed to provide a seamless and effective waste management solution for residential properties.

By collecting waste directly from homes on a regular schedule, we ensure cleanliness and sustainability in urban and suburban areas. Residents are encouraged to separate their waste into different bins or bags, promoting effective waste management.

Collected waste is efficiently transported to appropriate facilities for processing, recycling, or disposal.

Bulky Waste Collection:

Renuterra offers an efficient and sustainable solution for disposing of bulky waste, large items, or garden refuse.

Our service is designed to handle items that are not suitable for regular waste collection, providing convenience and efficiency for domestic, residential, and commercial properties.

We prioritize sustainable disposal methods, ensuring that bulky items are managed responsibly and in an environmentally friendly manner.

Construction & Demolition Waste:

Renuterra is committed to the efficient and sustainable management of construction and demolition (C&D) waste.

We recycle and reuse valuable materials, such as concrete, masonry, metals, wood, glass, and plastics, turning waste into resources.

Understanding the requirements of construction companies, Renuterra ensures compliance with reporting standards, providing detailed waste generation data and diversion rates required for LEED certification.

Our team will work closely with you to increase your diversion rate and deliver accurate reports promptly, helping you meet your sustainability goals with ease.

Our services reduce the burden on landfills, conserve natural resources, and lower greenhouse gas emissions.

Additionally, we ensure the proper handling and disposal of hazardous materials, protecting both the environment and public health.

Medical waste:

Medical waste requires specialized handling and disposal due to its potential for containing infectious agents. Renuterra provides dedicated services to ensure that this hazardous waste is managed safely and responsibly.

We handle various types of medical waste, including infectious, pathological, sharps, pharmaceutical, and chemical waste.

Our commitment to safety, environmental protection, and regulatory compliance ensures that medical waste is disposed of in accordance with the highest standards.

To support healthcare facilities, Renuterra works closely with your housekeeping team to ensure full compliance with medical waste handling regulations within the facility.

Our team provides valuable insights and practical tips to improve waste management practices and conducts regular training sessions to equip your staff with the necessary knowledge and skills.

03

What Are Our Solutions?

At Renuterra, we go beyond traditional waste management by offering innovative solutions that address the most pressing environmental challenges.

Our solutions are designed to promote sustainability, reduce waste, and maximize resource recovery, all while ensuring compliance with the highest standards of safety and efficiency.

Discover how our advanced waste processing technologies and tailored strategies can help your organization contribute to a greener future.

Innovative Recycling Tools:

Renuterra is committed to making recycling easier and more accessible through cutting-edge solutions tailored to client needs. We provide a variety of innovative tools and technologies designed to maximize recycling efficiency and encourage sustainable practices:

- **Smart Bins:** Equipped with advanced technology, these bins count the number of bottles or other recyclable items deposited and can reward users, promoting active participation in recycling efforts.
- **Reverse Vending Machines (RVMs):** Our RVMs are ideal for collecting recyclable materials like plastic bottles and aluminum cans. These machines incentivize recycling by offering rewards while ensuring proper segregation and efficient processing.
- **Food Digestion Machines:** Designed for food waste management, these machines break down organic waste into reusable by-products like compost or greywater, reducing the strain on landfills and contributing to a circular economy.

Waste-to-Value Solutions:

Renuterra is redefining waste management by turning waste into valuable resources through innovative technologies and tailored solutions. Our Waste-to-Value Solutions span multiple waste streams, ensuring maximum resource recovery and sustainability.

- **Organic Waste Transformation:** Using advanced tools such as biochar production systems, biogas generators, and food digesters, we convert organic waste into renewable energy, nutrient-rich by-products, and carbon credits. These solutions reduce landfill dependency, lower emissions, and contribute to a circular economy.
- **Construction waste Recycling:** We help construction and demolition companies reclaim valuable materials such as concrete, metals, wood, and plastics. By reprocessing these materials, we reduce landfill waste, conserve natural resources, and support LEED certification requirements with comprehensive waste reporting and diversion strategies.

Hazardous Waste Management Solutions

Renuterra offers comprehensive hazardous waste management services, ensuring the safe collection, treatment, and disposal of hazardous materials while prioritizing public health and environmental protection.

Our state-of-the-art hazardous waste treatment and incineration facility is equipped to handle a wide range of materials, including medical and chemical waste, with a daily capacity exceeding **25 tons**. By adhering to stringent regulatory standards and leveraging advanced technology, we ensure that hazardous waste is managed efficiently and responsibly.

Renuterra's solutions provide peace of mind for businesses and institutions, safeguarding both the environment and the communities we serve. Partner with us for reliable and compliant hazardous waste management tailored to your needs.

Smart Waste Insights solution

Renuterra leverages advanced data analytics to revolutionize waste management processes, offering clients real-time access to critical data. By monitoring waste generation, diversion rates, and recycling efficiency, we provide actionable insights that empower clients to enhance sustainability practices and reduce costs.

- **Live Data Access:** Renuterra clients benefit from immediate access to live data, enabling them to retrieve accurate and up-to-date information on waste generation and trends at any time. This transparency helps clients make informed decisions and improve their waste management strategies.
- **Waste Audits:** In-depth evaluations of waste streams and management practices to identify opportunities for improvement.
- **Operational Insights:** Data-driven recommendations to optimize efficiency and performance in waste management.
- **Cost Optimization:** Highlighting areas to reduce disposal expenses and maximize resource recovery.

With **Smart Waste Insights**, Renuterra equips businesses with the tools and information they need to adopt smarter, data-driven approaches, ensuring better decision-making and measurable progress toward sustainability goals.

Community Engagement & Education

Renuterra believes that creating lasting change in waste management begins with informed and engaged communities. Through our **Community Engagement and Education solutions**, we empower businesses, institutions, and individuals to embrace sustainable practices and take active roles in environmental stewardship.

- **Awareness Campaigns:** We organize targeted campaigns to educate communities about waste segregation, recycling, and sustainable waste management practices.
- **Workshops and Training:** Renuterra conducts interactive sessions and workshops for employees, students, and local groups to build knowledge and skills in managing waste effectively.
- **Collaborative Initiatives:** Partnering with schools, organizations, and municipalities, we lead projects aimed at reducing waste generation and increasing recycling rates.
- **Behavioral Insights:** We analyze waste management behaviors and provide actionable recommendations to improve participation and compliance in sustainability programs.
